## Old Man Watney

Old man Watney is a grumpy, lonely, and heartbroken old gardener after the disappearance of his only grandchild. He waits for the day his grandchild is found and for the day the local elementary school kids stop walking over his goddamn daisies.

Alphy

Alphy is a Chimera that is made by a mad scientist. Has a power of telekinisis and his life goal is trying help his creator to take over the world.

Project: Website Design Fall 2017

On September 20, 2017, Hurricane Maria, a powerful category 4 hurricane with 150 mph winds devastated the island of Puerto Rico, leaving at least 48 people dead, and decimating the island's power grid. Around 80% of the island's power transmission lines are damaged.

**60,000 home need roofing**

**3 million people still without power**

**1 million without running water**

World Health Organization (WHO) assessed that FEMA delivered only 9% of the island's drinking water requirement.

Essential services like medical care are a priority. The lack of water and basic needs remain a big problem. Many roads are in bad shape due to the continual rain, disrupting communication as the storm knocked out 1360 out of 1600 cellphone towers. Most hospitals are running on generators with limited fuel. Rebuilding the system on the island will be a long and difficult process.

In this optic, there is an urgent need for raising funds to reconstruct the infrastructures in the affected areas of Puerto Rico, and to help save

Your donation can help save lives. No amount is too small. All profits go directly to UNICEF and the Red Cross to support relief efforts for those effected by Hurricane Maria. Around 3 million people are still without power as 80% of the island's power transmission lines are damaged. Any type of donations will help buy needed supplies to aid those in need. The people of Puerto Rico need your help.

Faculty name: Uttam Kokil

Project: Website Design Fall 2017

Benevolente is partnered with UNICEF and the American Red Cross

For 70 years, across 190 countries and territories, UNICEF defends the rights of every child. Explore our work to see the programmes we create on behalf of children across the world.

UNICEF combines its experience and well-collected evidence and analysis to create programmes, campaigns and initiatives wherever they are needed most. Explore our reports to see how information can lead to change. UNICEF works with the United Nations other United Nations agencies to make sure that children are on the global agenda.

For more info, visit [unicef.org](http://unicef.org)

Each day, thousands of people - people just like you - provide compassionate care to those in need. Our network of generous donors, volunteers and employees share a mission of preventing and relieving suffering, here at home and around the world.

We roll up our sleeves and donate time, money and blood. We learn or teach life-saving skills so our communities can be better prepared when the need arises. We do this every day because the Red Cross is needed - every day.

For more info, visit [redcross.org](http://redcross.org)

Se benevolente.

Our mission is to be benevolent - to give aid to the victims of Hurricane Maria by providing nonperishable resources, including food, potable water, clothing, and shelter, and raising money through donations to support the Puerto Rican government's disaster relief fund.

## Disaster Strikes in Puerto Rico

The U.S. Territory Island of Puerto Rico Continues to Suffer after Monstrous Category 4 Hurricane

On Wednesday, September 20, 2017, the most powerful hurricane of the season struck the Caribbean. As a result of the storm, millions of families in Puerto Rico are homeless, cold, hungry, and in the dark as they endure the largest blackout in US history.

## News & Updates

### Deadly Waterborne Illness A New Threat to Puerto Ricans

Since the storm, 76 cases of leptospirosis, or Weil's disease, have been confirmed in Puerto Rico. Leptospirosis is caused by spiral-shaped bacteria known as "leptospira". Leptospira spreads from rodents after a flood and is contracted through drinking water or open wounds. Although cases of leptospirosis are very rare, leptospirosis can be fatal if not treated with antibiotics.

### Here's What You Can Give to the Benevolente Charity

Help us raise \$1 million for victims! In addition, we ask for your donations of bottled water, towels, blankets, soap, laundry detergent, pillows, blankets, clothing, and canned and dry foods. to raise \$1 million to provide relief for families and children who have been affected by Hurricane Maria.

[Read less](#)

### Children Facing Poverty & Emotional Struggle

There are over 175,000 children under age four in Puerto Rico, and most of them come from poor families struggling with food and home security. Psychologists report that such insecurity can negatively impact long-term cognitive and emotional development in young children. Childhood poverty is scary enough. Help us give Puerto Rican children and their families hope for a brighter future.

Project: Homage to Storytelling: Illustration and Interpretation

"You've been asleep for three years now!" the crow said. The man looked at his beard, which was several feet long, and realized that the crow had spoken the truth. "Tell me, how can I thank you?" "By giving me one of your three sisters in marriage..." The crow asked all three sisters to visit his castle.

#### THE ENCHANTED QUILL

The path took them through a forest of lemon trees and then on to a beautiful castle. The crow said to the two sisters: "Don't get too curious about things." The two sisters tiptoed toward the door and peeked through the keyhole. All at once, everything changed: The castle and the carriage disappeared, and the three young women were standing under a fir tree. The crow was up in the branches, scolding them: "Now only the youngest can save me. She must walk to the city in rags and accept whatever work she is given."

#### THE ENCHANTED QUILL

Student name: Jerry Bellone

School name: New Jersey Institute of Technology (NJIT)

Program/department: Digital Design (School of Art + Design)

Faculty name: Polina Zaitseva

Project: Homage to Storytelling: Illustration and Interpretation

Suddenly the crow appeared at the window, turned his wing to her, and said: "Pull out one of my feathers, and if you use it to write down a wish, the wish will come true." With a heavy heart she pulled a feather out. Before the noonday meal, she wrote down the names of the very finest dishes with the quill...That's how she got the suitors off her back.

**THE ENCHANTED QUILL**

The time had come. The crow arrived, and now he had turned into a prince. He rode with the beautiful cook to his magnificent castle.

Project: Movie Title Sequence\Darkness Under the Sun

with  
August MacIntyre  
as Hugh McDowell

The background of the title sequence is a sepia-toned illustration. It depicts a man in 19th-century military attire, including a bicorne hat, a dark uniform with a high collar, and breeches with puttees. He stands on a wooden plank walkway, holding a long rifle vertically. To his left is a large, leafy tree. The background shows a landscape with rolling hills and a body of water under a cloudy sky. The entire scene has a grainy, hand-drawn aesthetic.

Laurel Braitman asks what we as humans can learn from watching animals cope with depression, sadness, and other all-too-human problems.

## Depressed Dogs, Cats with OCD: What **Animal Madness** Means for Us Humans

By: Laurel Braitman

**O**liver was an extremely dashing, handsome, charming, and largely unstable male that I completely lost my heart to. He was a Bernese mountain dog, and my ex-husband and I adopted him, and about six months in, we realized that he was a mess: he had such paralyzing separation anxiety we couldn't leave him alone. Once, he jumped out of our third floor apartment. He ate fabric. He ate recyclables. He hunted flies that didn't exist. He suffered from hallucinations and was eventually diagnosed with a canine compulsive disorder and that's really just the tip of the iceberg. But with humans, sometimes it's six months in before you realize the person you love has some issues. And most of us don't take the person we're dating back to the bar where we met them or give them back to the friend that introduced us or sign them back up on Match.com. We love them anyway, and we stick to it, and that's what I did with my dog.

I have a Ph.D. in history of science from MIT and had you asked me 10 years ago if a dog I loved, or dogs generally, had emotions, I would have said yes, but I'm not sure I would have told you they can also wind up with an anxiety disorder, a Prozac prescription, and a therapist. But then, I fell in love, and I realized they can and trying to help my own dog overcome his panic and his anxiety changed my life. And I spent the last seven years, looking into this topic of mental illness in

other animals. Can they be mentally ill like people, and if so, what does it mean about us? What I discovered is I do believe they can suffer from mental illness and trying to identify mental illness in them often helps us be better friends to them and can also help us better understand ourselves.

So let's talk about diagnosis. Many of us think we can't know what another animal is thinking, but any of you in relationships — at least this is my case — just because you ask someone you're with or your parent or your child how they feel doesn't mean they can tell you. They may not have words to explain what it is they're feeling, and they may not know. It's actually a pretty recent phenomenon we feel we have to talk to someone to understand their emotional distress. Most mental disorders in the United States are fear and anxiety disorders, and when you think about it, fear and anxiety are extremely helpful animal emotions. Usually we feel fear and anxiety in dangerous situations, and once we feel them we are motivated to move away from whatever is dangerous. The problem is when we begin to feel fear and anxiety in situations that don't call for it.

## INDELIBLE IMAGES

### The Power of Vulnerability

Brené Brown studies human connection our ability to empathize, belong, love.

BY BRENE BROWN

**T**HERE WAS ONLY ONE VARIABLE that separated the people who have a strong sense of love and belonging and the people who really struggle for it. I am a researcher-storyteller, and I'm going to talk to you today about expanding perception. So I want to talk to you and tell some stories.

So I want to talk to you and tell some stories about a piece of my research that fundamentally expanded my perception. Shame is really easily understood as the fear of disconnection: Is there something about me that, if other people know it or see it, that I won't be worthy of connection?

The things I can tell you about it: It's universal, we all have it. The only people who don't experience shame have no capacity for human empathy or connection. No one wants to talk about it, and the less you talk about it, the more you have it, and that was, the people who have a strong sense of love and belonging believe they're worthy of love and belonging. And so these folks had, very simply, the courage to be imperfect. They had the compassion to be kind to themselves first and then to others. You can't numb those hard feelings without numbing the other affects, our emotions. You cannot selectively numb. So when we numb those, we numb joy, we numb gratitude, we numb happiness. The other thing we do is we make everything that's uncertain certain. Religion has gone from a belief in faith and mystery to certainty. "I'm right, you're wrong. Shut up." That's it. Just certain. The more afraid we are, the more vulnerable we are, the more afraid we are. This

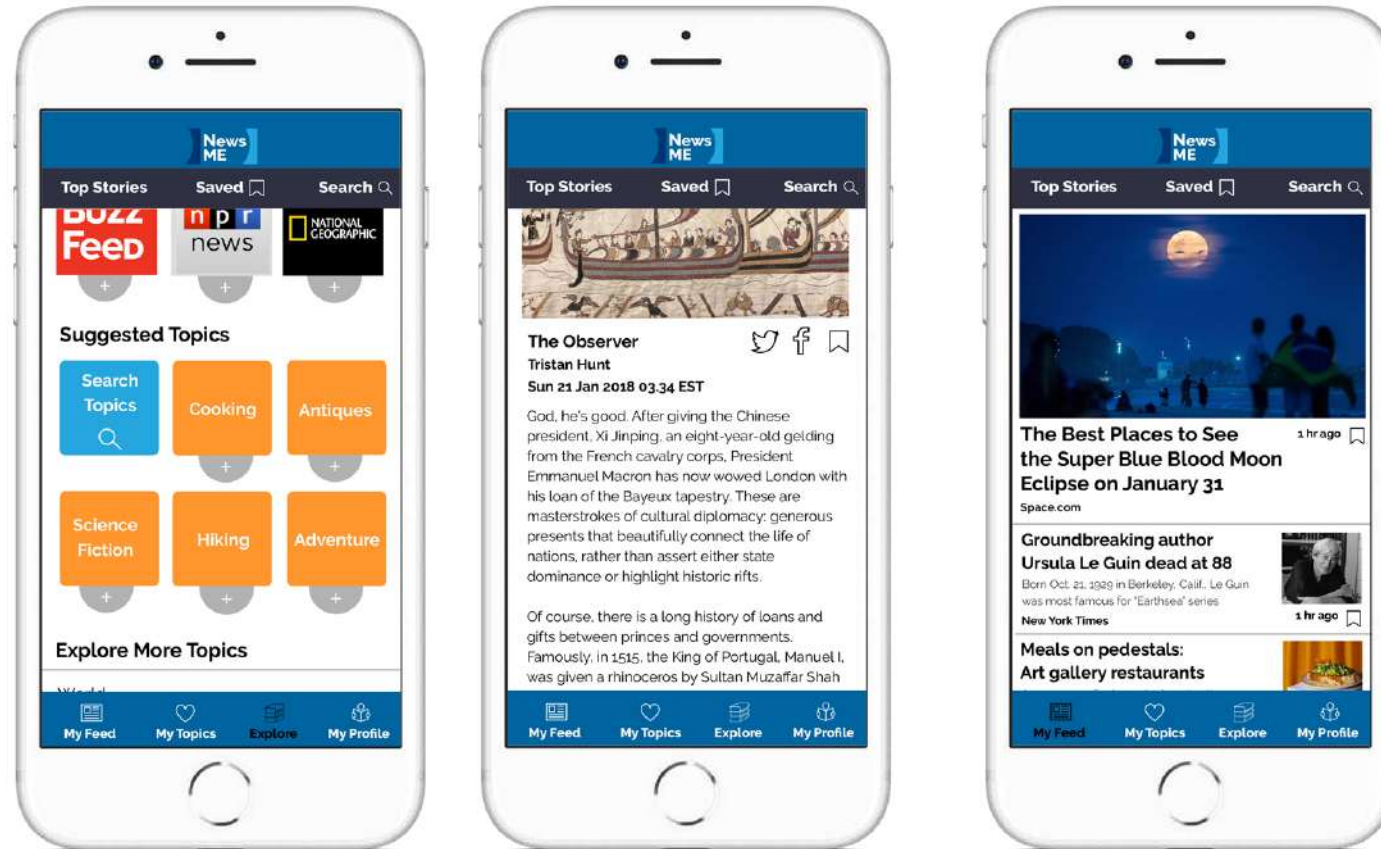

is what politics looks like today. There's no discourse anymore. There's no conversation. There's just blame. You know how blame is described in the research? A way to discharge pain and discomfort. We perfect.

This is what I have found. To let ourselves be seen, deeply seen, vulnerably seen... to love with our whole hearts, even though there's no guarantee—and that's really hard, and I can tell you as a parent, that's excruciatingly difficult—to practice gratitude and joy in those moments of terror, when we're wondering, "Can I love you this much? Can I believe in this this passionately? Can I be this fierce about this?"

Just to be able to stop and, instead of catastrophizing what might happen, to say, "I'm just so grateful, because to feel this vulnerable means I'm alive." And the last, which I think is probably the most important, is to believe that we're enough. Because when we work from a place, I believe, that says, "I'm enough" ... then we stop screaming and start listening.
